PROJECTS

WALLETWISE – EXPENSE TRACKER

Mar 2025 – May 2025

Built a web-based expense tracker to record and manage daily financial transactions. Key features include adding, editing, and deleting expenses with automatic balance calculation. Developed using HTML, CSS, and JavaScript, with localStorage for data persistence. Focused on functionality and core logic to support personal budgeting and financial awareness.

ZOMATO DATA ANALYSIS

Jan 2025 – Feb 2025

Analyzed a Zomato dataset to uncover key insights about restaurant trends, customer preferences, and location-based ratings. Performed data cleaning, preprocessing, and visualization using Python libraries such as Pandas, Matplotlib, and Seaborn. Identified high-performing cuisines, top-rated locations, and pricing trends to support data-driven decision-making for food service platforms. Demonstrated skills in data wrangling, exploratory data analysis (EDA), and storytelling through visuals.
